Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence and Data Science with strong interest in data analysis, machine learning, and frontend development. Hands-on experience in AI-based projects, data analysis, internships, and modern frontend technologies. Seeking entry-level roles in Data Analytics, Data Science, or Frontend Development.

Education

B.Tech – Computer Science Engineering (Artificial Intelligence & Data Science)

Bonam Venkata Chalamayya Institute of Technology and Science
2023 – 2027

CGPA: 7.0
Andhra Pradesh

Technical Skills

- Programming Languages: Python, JavaScript
- Frontend Technologies: HTML, CSS, JavaScript, React
- Libraries & Frameworks: NumPy, Pandas, Scikit-learn, React
- Tools & Platforms: GitHub, VS Code
- Database: SQL

Projects

Car Model Detection Using Generative AI

- Developed a Machine Learning and Generative AI based system to detect car models and display specifications using image classification techniques.
- Trained and tested the model using modern AI techniques.
- Built a simple interactive interface for model demonstration.
- Tools Used: Machine Learning, Streamlit, Kaggle, VS Code

Internship Experience

Data Analytics Intern

2 Months

- ★ Gained hands-on experience in data analysis concepts and tools.
- ★ Worked with datasets for cleaning, visualization, and insight generation.
- ★ Improved analytical and problem-solving skills through real-time tasks.

Certifications & Hackathons

Certifications

- Python Full Stack Developer – EduSkills
- Data Science – EduSkills
- Cloud Computing – NPTEL

Hackathons

- Generative AI Hackathon
- Blockchain Hackathon

Achievements

LeetCode Profile: Solved 100+ questions focusing on dynamic programming, graphs, and greedy algorithms.
